### **DETAILED ACTION**

The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1632.

#### ***Election/Restriction***

1. Applicant's election of Group I, claims 1-39, in Paper No. 9 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim 40 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 9.

2. Upon further review of the claims, restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 and 5-39, drawn to a method of delivery a polynucleotide encoding a protein to a parenchymal cell, classified in class 514, subclass 44.
- II. Claims 1-39, drawn to a method of delivery a polynucleotide encoding a protein to a parenchymal cell, classified in class 514, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

Groups I and II are patentably distinct because the purpose of delivering a polynucleotide encoding a protein is to produce the protein while the purpose of delivering a blocking

Art Unit: 1632

polynucleotide is to prevent protein production. The structure of polynucleotides encoding a protein and blocking polynucleotides also requires a different search. As such, the burden required to examine both together would be undue.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
